## Category 6 UTP Reduced Diameter (28 AWG) Patch Cords

Standard Category 6 Patch Cord  
 Nominal Outer Jacket Diameter .290"

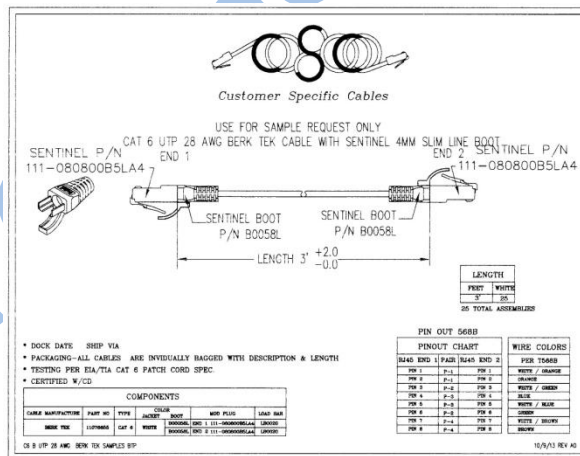

Slim 6 Category 6 Patch Cord  
 Nominal Outer Jacket Diameter .148"

With a significant reduction in cable diameter and weight, Slim 6 Patch Cords decrease cabling congestion and allows for increased airflow in the data center. The Slim 6 design directly integrates with the recommended TIA-942 structured cabling standard and can be used in applications up to 30 feet in length.
